

**Just Cuts**  
**March 2020**  
**Corona Virus (COVID\_19)**

Dear Clients,

The current Corona Virus (COVID\_19) outbreaks have made this a time when we are all focused and aware of hygiene practices in our day to day lives.

We are advising all Just Cuts Teams to follow the current government statements. Just Cuts have also added extra precautions to our salon service. We would like to take this time to highlight that hygiene has always been a high focus area of our service process at Just Cuts.

For 30 Years we have set the standard with salon hygiene practices across 200+ locations.

**At Just Cuts we have always and will continue to:**

- Use an individual, sanitised comb to cut each Client's hair; each Client gets a fresh comb used on them for the Style Cut and then that comb is put into a sanitising process throughout the day.
- Individual disposable neck strips; each Client has a neck strip applied to protect the capes we use in salon and to ensure Client comfort.
- Medi Swipes; You will see Just Cuts Stylists sanitising the blades of their cutting scissors and clippers with individual Medi Swipes prior to every cutting service.
- Disposable towels are used in most Just Cuts salons, to increase the hygiene standard of our service process.

We will continue to uphold our high sanitation standards and have added to this process, to meet the current need for extra vigilance in these areas:

- The use of hand sanitisers at the styling station and reception areas.
- Gloves and disinfectant wipes for cleaning hard surfaces in salon, such as the chairs, keyboards and Eftpos machines.

**Thank you for doing your part to help keep Just Cuts Stylists and fellow Clients safe, and for supporting our ongoing commitment to the highest standards of hygiene and safety in each Just Cuts location for everybody.**
